

Type 92EZ: Fisher's Newest Steam Regulator

NPS 1, 1-1/2, 2 Launch: October 1st 2025

NPS 3, 4 Launch: October 1st 2026

92B Obsolescence: January 1st 2027

Engineered to make
your life *EZ*.

Drop-In Trim Kit™

1

3-Minute Maintenance
using the 92EZ Drop-In Trim Kit™

Reduces OPEX by minimizing downtime & maintenance cost per unit

Simplifies user experience for both newer & tenured field technicians

2

Differentiated Stem Seal Design
optimizing stability & flow at any setpoint

Withstands seasonal load variations & enables maximum energy efficiency

Streamlines operations by consolidating products through superior performance versatility

3

Competitive Lead Times
leveraging Emerson's global footprint of the Fisher E-Body

Enhances scheduling reliability for orders and installations

Minimizes downtime concerns while simplifying maintenance through a familiar valve body design.

Legacy 92B Pilot
retaining bellows stem guide design for reliable control of dirty steam

Accelerates 92B change management & consolidates pilot spare parts

Innovates while preserving the reliability and quality the Type 92B has pioneered for over 80 years.

That's EZ.
