

Figurate™ automation powered by

DeltaV™

Dynamic control software for upstream, downstream and filtration

Figurate™ automation is designed and verified to enable efficient development and manufacturing of biopharmaceuticals. Deployed within an integrated FlexFactory™, this configurable automation platform allows for a scalable, process-ready solution that leverages the full benefit of Emerson's DeltaV™ platforms.

UPSTREAM UNIT OPERATIONS

Xcellerex™ XDR
bioreactor

Xcellerex™ XDUO
mixer

ReadyToProcess™
WAVE 25 bioreactor

DOWNSTREAM UNIT OPERATIONS

ÄKTA ready™ XL
chromatography

ÄKTA readyflux™ XL
filtration

FEATURES

Batch Control
